IN THE CLAIMS:

Please amend the claims as follows:

1. (Currently Amended) A method for naming a mobile station picture file, in which picture file there is saved a picture produced by the camera of the mobile station, that the method comprising ~~the following steps~~:

      among the data available in the mobile station, there is searched a given feature associated to the picture,

      of ~~said~~a found feature, there is created a name suggestion that is added in ~~the~~a name suggestion list containing name suggestions for the picture file in order to create said name suggestion list, and

      the created name suggestion list is displayed in ~~the~~a user interface, where the picture file name is editable.

2. (Currently Amended) A method according to claim 1, wherein in the mobile station, there is searched ~~the~~ date and time information associated to ~~the~~a moment of shooting, a name suggestion is created based on ~~the basis of~~ said time information, and the name suggestion is added in the picture file name suggestion list.

3. (Currently Amended) A method according to claim 1, wherein in the mobile station, there is searched a calendar event that is at a given accuracy associated to ~~the~~a moment of shooting, and in case such a calendar event is found, said calendar event is added as a name suggestion in the picture file name suggestion list.

4. (Currently Amended) A method according to claim 1, wherein in the mobile station, there is searched ~~the~~a file name of ~~the~~a previously saved picture file, and it is added as a name suggestion in the picture file name suggestion list.

5. (Previously Presented) A method according to claim 1, wherein in the mobile station operational profile and settings, there is searched data associated to the

picture according to certain criteria, and said data is used for creating a name suggestion in the picture file name suggestion list.

6. (Currently Amended) A method according to claim 1, wherein the picture ~~to be saved~~ is processed by an image recognition algorithm of the mobile station in order to produce a picture file name suggestion by means of ~~the~~ features recognized in the picture, and that the produced name suggestion is added in the picture file name suggestion list.

7. (Currently Amended) A method according claim 1, wherein ~~there is searched the~~ location information of the mobile station is searched, and based on ~~the basis of~~ said location information, there is created a name suggestion to be added in the picture file name suggestion list.

8. (Currently Amended) A method according to claim 1, wherein in the mobile station, there is searched a name suggestion defined by ~~the~~ a user, and said found name suggestion defined by the user is added in the picture file name suggestion list.

9. (Currently Amended) A method according to claim 1, wherein the name suggestions contained in the created picture file name suggestion list are arranged in an order of priority according to certain predetermined priority rules, so that ~~the~~ a name suggestion with ~~the~~ a highest priority is arranged first in the name suggestion list, and that ~~the~~ a first name suggestion of the name suggestion list is set as ~~the~~ a default name of the picture file in the user interface.

10. (Currently Amended) A method according to claim 1, wherein in the user interface the picture file name is editable, and the picture file name is chosen among the displayed name suggestions by pointing ~~one or several of them~~.

11. (Previously Presented) A method according to claim 10, wherein in the user interface the picture file name is editable, and the picture file name is created by editing the picture file name suggestion.

12. (Currently Amended) A method according to claim 1, wherein the ~~steps according to the~~ method ~~are~~is performed in the mobile station before ~~taking~~producing the picture~~, to be later saved,~~ by the camera of the mobile station ~~camera~~.

13. (Currently Amended) A method according to claim 1, wherein the ~~steps according to the~~ method ~~are~~is performed immediately after the picture ~~to be saved is taken~~ is produced by the ~~mobile station~~ camera of the mobile station.

14.(Currently Amended) A method according to claim 1, wherein the ~~steps according to the~~ method ~~are~~is performed based on ~~the basis of~~ a previously saved picture that is already stored in ~~the~~a memory of the mobile station and contained in a picture file.

15. (Currently Amended) ~~An arrangement~~Apparatus for naming a picture file containing a picture produced by a ~~mobile station~~ camera of a mobile station, said ~~arrangement~~apparatus including

 ~~means for searching~~a control unit configured to search a given feature associated to the picture from ~~a~~ data available in the mobile station,

 ~~means for creating~~to create a name suggestion based on ~~the basis of~~ said searched feature,

 ~~means for adding~~to add the created name suggestion in ~~the~~a name suggestion list ~~of~~for the picture file and ~~hence~~ means for creating said name suggestion list,

 ~~means for displaying~~to display the created name suggestion list in ~~the~~a user interface, and

 ~~means for editing~~to edit the picture file name in the user interface.

16. (Currently Amended) ~~An arrangement~~Apparatus according to claim 15, ~~including means for searching~~configured to search in the mobile station date and time information associated to ~~the~~a moment of shooting, in order to create a name

suggestion of ~~the~~ found information and in order to add the name suggestion as a name suggestion in the name suggestion list of the picture file.

17. (Currently Amended) ~~An arrangement~~Apparatus according to claim 15, ~~including means for searching~~configured to search in the mobile station a calendar event associated to ~~the~~a moment of shooting at a given accuracy, and ~~means for setting the possibly~~configured to pet a found calendar event as a name suggestion in the picture file name suggestion list.

18. (Currently Amended) ~~An arrangement~~Apparatus according to claim 15, ~~including means for searching~~configured to search in the mobile station ~~the~~a previously saved picture file name and ~~for adding~~to add it as a name suggestion in the picture file name suggestion list.

19. (Currently Amended) ~~An arrangement~~Apparatus according to claim 15, ~~including means for searching~~configured to search information in an operational profile and settings of the mobile station ~~operational profile and settings~~, and ~~means for creating~~to create a name suggestion based on ~~the basis of the~~ found information, and ~~means for adding the~~to add a created name suggestion in the picture file name suggestion list.

20. (Currently Amended) ~~An arrangement~~Apparatus according to claim 15, ~~including image recognition means for processing the picture to be saved and for searching~~configured to search for recognizable features in the picture produced by the camera, as well as ~~means for creating~~to create a picture file name suggestion according to the features recognized in the picture.

21. (Currently Amended) ~~An arrangement~~Apparatus according to claim 15, ~~including means for enquiring~~configured to determine location information of the mobile station and ~~means for creating~~to create a picture file name suggestion based on ~~the basis of received~~determined location information.

22. (Currently Amended) ~~An arrangement~~Apparatus according to claim 15, ~~including means for feeding~~configured to feed the picture file name suggestion, and ~~means for searching~~to search from the mobile station the picture file name suggestion saved in the mobile station.

23. (Currently Amended) ~~An arrangement~~Apparatus according to claim 15, ~~including means for arranging~~configured to arrange the picture file name suggestions created in the mobile station in an order of priority according to certain predetermined priority rules, ~~means for arranging the name suggestion list~~ so that ~~the~~a name with ~~the~~a highest priority is first in the name suggestion list, and ~~means for setting~~configured to set the name suggestion that is first in the list as ~~the~~a picture file default name.

24. (Currently Amended) ~~An arrangement~~Apparatus according to claim 15, ~~including means for selecting~~configured to select the picture file name from the name suggestion list displayed in the user interface by pointing ~~one or several of the name suggestions~~.

25. (Currently Amended) ~~An arrangement~~Apparatus according to claim 24, ~~including means for editing~~configured to edit the picture file name suggestion in the user interface.

26. (Currently Amended) ~~An arrangement~~Apparatus according to claim 15, ~~wherein said means are~~configured with software ~~means~~.

27. (Currently Amended) A computer ~~program product~~readable medium having instructions for naming ~~the~~a picture file recording a picture taken by a ~~mobile station~~ camera of a mobile station, said ~~computer program product including computer-readable~~instructions ~~embodied in a computer readable medium that upon execution in a computer implement the steps of~~for:

searching a given feature associated to the picture from the data available in the mobile station,

adding the searched feature in ~~the~~a picture file name suggestion list and ~~hence for~~ creating said name suggestion list,

displaying the ~~created~~ name suggestion list in ~~the~~a user interface, and

editing the picture file name in the user interface.

28. (Currently Amended) An arrangement for naming a picture file containing a picture produced by a mobile station camera, said arrangement including a control unit, which control unit is arranged to

search a given feature associated to the picture from a data available in the mobile station,

create a name suggestion on the basis of said searched feature,

add the created name suggestion in the name suggestion list of the picture file and hence create said name suggestion list,

display the created name suggestion list in a user interface, and

receive an edited picture file name from said user interface.

29. (Currently Amended) ~~An arrangement~~Apparatus according to claim 28, wherein said control unit is arranged to search in the mobile station date and time information associated to ~~the~~a moment of shooting, in order to create a name suggestion of ~~the~~ found information and in order to add the name suggestion as a name suggestion in the name suggestion list of the picture file.

30. (Currently Amended) ~~An arrangement~~Apparatus according to claim 28, wherein said control unit is arranged to search in the mobile station a calendar event associated to ~~the~~a moment of shooting at a given accuracy, and to set ~~the possibly~~a found calendar event as a name suggestion in the picture file name suggestion list.

31. (Currently Amended) ~~An arrangement~~Apparatus according to claim 28, wherein said control unit is arranged to search in the mobile station a previously saved picture file name and to add it as a name suggestion in the picture file name suggestion list.

32. (Currently Amended) ~~An arrangement~~Apparatus according to claim 28, wherein said control unit is arranged to search information in ~~the mobile station~~ operational profile and settings of the mobile station, and to create a name suggestion based on ~~the basis of the~~ found information, and to add the created name suggestion in the picture file name suggestion list.

33. (Currently Amended) ~~An arrangement~~Apparatus according to claim 28, wherein the ~~arrangement~~apparatus includes an image recognizer arranged to process the picture ~~to be saved~~produced by the camera and to search recognizable features in the picture, and the control unit is arranged to create a picture file name suggestion according to ~~the~~ features recognized in the picture.

34. (Currently Amended) ~~An arrangement~~Apparatus according to claim 28, wherein the control unit is arranged to ~~enquire~~determine location information of the mobile station and to create a picture file name suggestion based on ~~the basis of~~ received location information.

35. (Currently Amended) ~~An arrangement~~Apparatus according to claim 28, wherein said user interface is arranged to receive the picture file name suggestion, and the control unit is arranged to search from the mobile station the picture file name suggestion saved in the mobile station.

36. (Currently Amended) ~~An arrangement~~Apparatus according to claim 28, wherein said control unit is arranged to arrange the picture file name suggestions created in the mobile station in an order of priority according to certain predetermined priority rules, to arrange the name suggestion list so that ~~the~~a name with ~~the~~a highest priority is first in the name suggestion list, and to set the name suggestion that is first in the list as ~~the~~a picture file default name.

37. (Currently Amended) ~~An arrangement~~Apparatus according to claim 28, wherein said control unit is arranged to select the picture file name from the name suggestion

list displayed in the user interface as a response to a user pointing to one or several ~~of the~~ name suggestions.

38. (New) ~~An arrangement~~Apparatus according to claim ~~24~~28, wherein the user interface is arranged to receive changes to the picture file name suggestion.
